Summary

Experienced Web Developer specializing in modern frontend development and e-commerce solutions. Strong background in building scalable, user-focused web applications using JavaScript frameworks, and currently expanding software engineering expertise toward full-stack development.

Technical Skills

JavaScript, TypeScript, React (Next.js), Vue.js (Nuxt.js), Python, HTML5/Pug, CSS/SCSS, REST APIs, SQL, Shopify, WordPress, Twig, Jest, Cypress, Storybook, Figma, PHP, Agile, UX/UI, Bootstrap, Bulma, Vuetify, Material-UI, Git.

Professional Experience

Independent Contractor | Web Developer — *Minneapolis, MN 03/2022 - Present*

- Deliver full-cycle web development for clients across business websites, portfolios, and e-commerce platforms, managing projects from concept, design implementation, and custom frontend development to CMS setup, deployment, content management, SEO, analytics, and post-launch support.
- Develop modern, responsive web solutions using React, Next.js, TypeScript, Tailwind CSS, WordPress, WooCommerce, and Shopify, including custom headless e-commerce storefront development, with a focus on clean UI, performance, usability, maintainable code, and business-ready digital products.

ChannelPilot | Front End Developer — *Hamburg, Germany 04/2022 - 10/2022*

- Contributed to a large-scale, production Vue.js application for enterprise clients, building reusable components within a complex frontend architecture.
- Improved application stability by implementing automated unit (Jest) and end-to-end (Cypress) tests, helping reduce regressions and production issues.
- Collaborated with an international, English-speaking team of 7 engineers within a structured code review process, contributing to shared coding standards and maintaining high-quality, scalable code.

Knubisoft | Front End Developer — *Kharkiv, Ukraine 03/2021 - 11/2022*

- Developed multiple SPA applications, delivering projects from design mockups to production with a focus on clean, maintainable frontend architecture.
- Contributed to a major React-based redesign of a client-facing application, improving UI, performance, and overall user experience.
- Mentored junior developers, promoting best practices, clean code standards, and consistent architectural patterns.

Quadecco | Web-developer — *Kharkiv, Ukraine 02/2020 - 03/2021*

- Maintained and enhanced a PHP/TWIG-based jewelry e-commerce platform with a MongoDB backend, improving UI consistency, responsiveness, and product-related features.
- Expanded responsibilities to include SPA application development alongside legacy platform maintenance.

Education & Certifications

A.A.S. in Software Development (In Progress) — Minneapolis Community & Technical College, MN
M.S. in Process Engineering — Kharkiv Polytechnic Institute, Ukraine

Certifications: Udemy (SQL, Vue.js, React, TypeScript)
